

"This is one of the BEST professional development programmes I've ever attended. It was engaging and relevant, and I am confident about going back to class and implementing the content effectively."

US-based STEAM Teacher

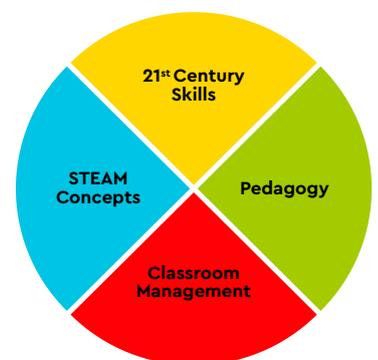

LEGO® Education Professional Development

A personalised learning programme that inspires teachers to learn, practise and master competencies to facilitate playful, hands-on STEAM learning.

Engage actively in this experiential, personalised professional learning programme designed to produce a strong set of transferrable instructional skills and strategies. A selection of self-guided and facilitated learning is offered virtually and on-site.

Competency-based framework

The programme is founded on a competency-based framework that is rooted in four core competency categories: Pedagogy, STEAM Concepts, 21st Century Skills and Classroom Management. These critical competencies enable teachers to facilitate and fully realise the learning promises in every LEGO® Education solution to drive pupil learning outcomes.

Self-guided Learning

Free online on-demand and self-guided learning that targets individual needs and learning preferences. Get access anywhere and anytime to:

- Interactive competency-based modules
- Product video tutorials
- LEGO® Education learning philosophy

Learn more: LEGOeducation.com/PD

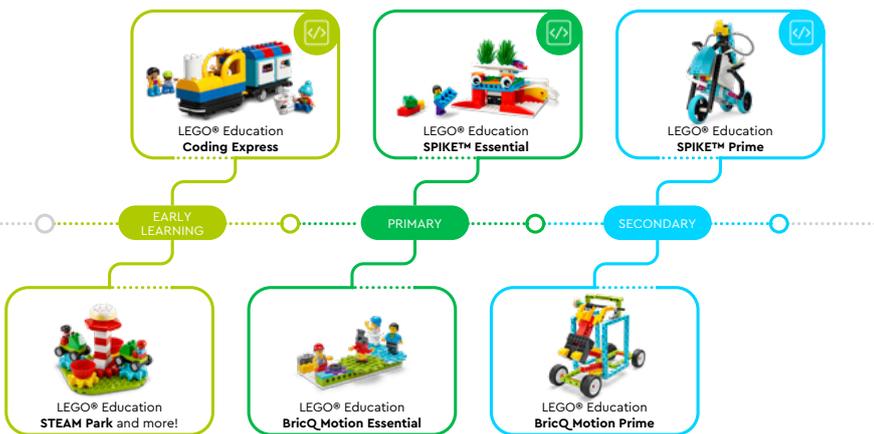

Facilitated Learning

Facilitated learning provides full-day product training courses led by a certified LEGO Education trainer. These virtual or on-site courses are engaging learning experiences that build the confidence to facilitate hands-on, playful STEAM learning using LEGO Education products.

- Hands-on product training courses
- A more extensive and interactive alternative to online self-guided product training

About LEGO® Education

LEGO® Education offers a range of playful, hands-on STEAM learning experiences based on the LEGO system of bricks – that meet pupils wherever they are in their learning journey, regardless of their ability. From the Early Learning portfolio to the LEGO Learning System, our solutions create an environment where active, collaborative learners future-proof their skills and spark a lifelong love of learning, whether it's in-person, virtual or a mix of both.
